Elaheh Arjomandi

Frontend Engineer React.js, TypeScript, Next.js
Copenhagen, Capital Region of Denmark, Denmark

Summary

I build things for the web, constantly learning and refining how ideas turn into usable products. My job is to make the complicated stuff underneath disappear, so the person on the other end just gets something that works. What I've learned along the way is that great products aren't really about the code — they're about the people building them together: designers, engineers, editors, product teams, all pulling in the same direction. I still think of myself as a learner more than an expert, and that's exactly what keeps this work interesting. If you're building something ambitious in Copenhagen and want someone who cares about the details as much as the big picture, I'd love to talk. Currently working in: React · Next.js · TypeScript · GraphQL

Experience

Nets Group

Frontend Engineer

June 2022 - Present (4 years 3 months)

Denmark

- Developed and maintained a scalable multi-tenant platform built with Next.js and TypeScript, supporting 2 brands and hundreds of CMS-managed pages from one shared codebase.
- Designed and maintained a CMS-driven page assembly system built from 80+ reusable, testable components, turning unclear editorial and business requirements into consistent, predictable page layouts.
- Improved code quality and readability by leveraging Playwright and Vitest and performance optimization.
- Applied Agile methodologies to streamline development and management workflows

Moodagent

Frontend Developer

October 2020 - March 2022 (1 year 6 months)

- Managed application state with Redux, structuring actions and reducers to keep playback, playlist, and recommendation UI consistent and predictable across the app.
- Translated Figma/Sketch prototypes into polished, functional UI for a consumer product, working closely with design to align on flows before building.

PayTack Sverige

Full stack intern

July 2020 - October 2020 (4 months)

Copenhagen Metropolitan Area

React | Sass | AWS amplify | Git

PayTack AB

Junior front end developer

November 2019 - January 2020 (3 months)

Developing a landing page in ReactJS and working closely with the UI/UX designer.

React | Sass | Git | Zeplin

Refarmed

Frontend design intern

February 2019 - April 2019 (3 months)

Copenhagen Area, Capital Region, Denmark

Helping the company to create its online presence by developing a responsive landing page in javascript and designing some UI elements.
